# Albums - Details

1. Album View

Allow user to create new album with a collection of user-selected images and videos
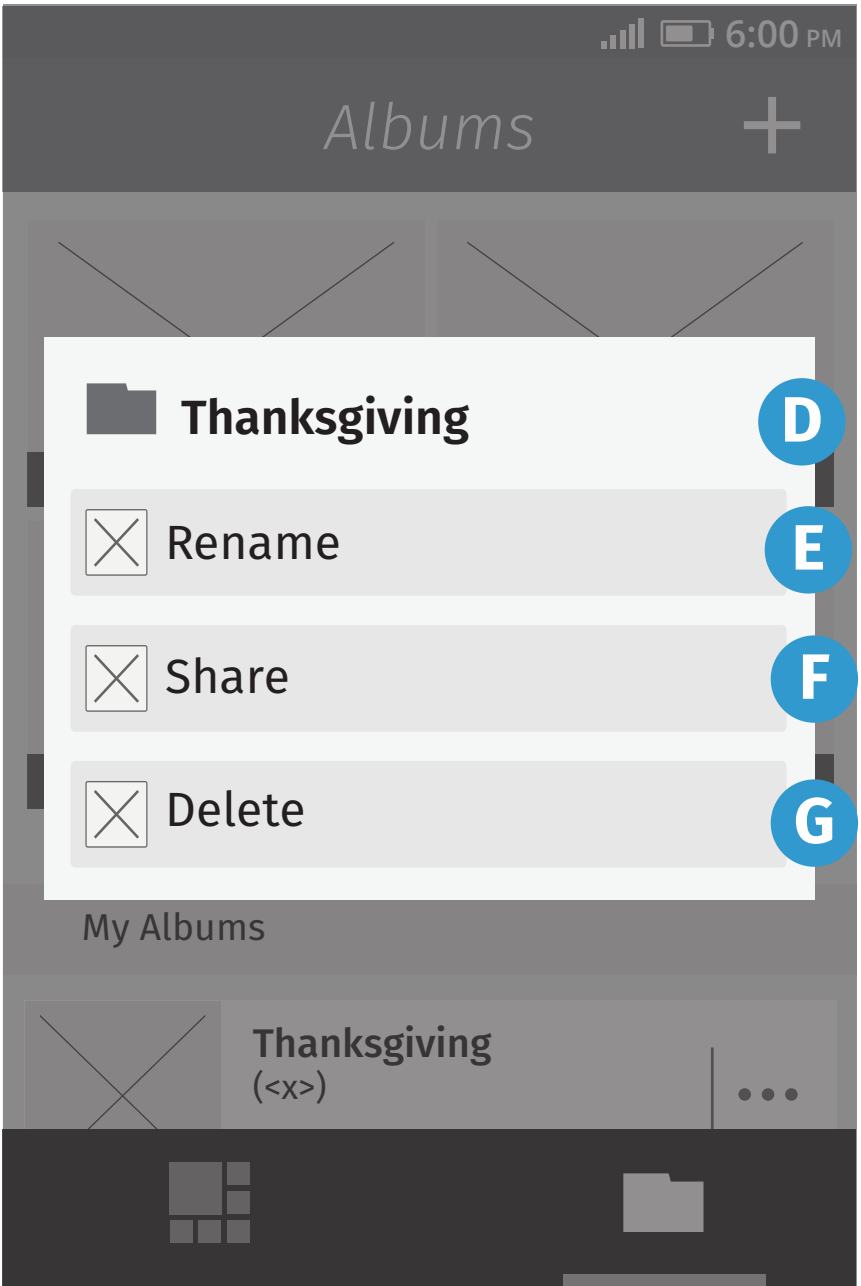

2. Create New Album - input dialog

Create New Album activity allows user to create and name new album

3. Album View - New Album

New user-defined albums appear below the "My Album" subheader and are listed by date created, most recent at the top (like images and videos).

4. Album View - New Album Options

User-defined specific activities include:
· Rename
· Share : (TBD : MozShare?)
· Delete

Future release options?:
· Permissions : multiple contributors
· Permissions: hide/passlock
· Tagging (sharing, location, friends, etc)

Notes

A + Add / Create New Album
Functionality is new - initiates create new album activity.

B Create New Album : Input Dialog
Uses Building Block / common control of input dialog. Presents user with editable text field, Cancel and Save buttons and keyboard.

C Album Options
Show action menu with options before continuing to specific activity.

D Dialog with Title
Present dialog with title <album name> to re-affirm to the user that the options displayed will act on that specific (user-defined) album.

E Rename
Allows user to rename / edit Album name, open input dialog

F Share : TBD for 2.2 / MozShare?
Functionality behaves similarly to all Gallery share activity - show action menu with options before continuing on to share options

G Delete
Functionality behaves similarly to all Gallery delete activity - first present a confirmation before finishing the action.

Firefox OS
