Firefox OS

Ringtones 2.1

Version 1.0 June 24, 2014

Questions? E-mail the author or firefoxos-ux@mozilla.com

Release Notes

v1.0   June 24, 2014   Tiffanie Shakespeare   New spec based off of 2.0 work

Open Issues

~~Need Value Selector with Sub-header Building Block to be built by Eng team - bug #994355~~
~~- this is actually TBD as we may not go this route for the picker~~
New sound picker design does not require additional Building Blocks.

~~In order to pick a ringtone from Contacts or Alarm, we need to solve the delete issue. When the user deletes a ringtone from the manager, all instances need to be deleted as well.~~
Pushed until next release.

User Stories

As a user, I want to be able to "crop" an audio file when creating a ringtone, so that I can select just a portion of the file to be played.

IA Diagrams

Edit Ringtone

Sounds → Ringtone Manager

Ringtone Manager —New→ Create

Create —Cancel→ Ringtone Manager

Create —Save→ Confirmation /Playback

Confirmation /Playback —Edit→ Create

Confirmation /Playback —Save→ Save Banner

Save Banner → Ringtone Manager

Ringtones in Settings

New Ringtone - Crop Details

Step 1

✕   Create Ringtone   Next

Title of the Song
Artist Name

▶   01:00 ━━━━━━⊙━━━━━ 01:33
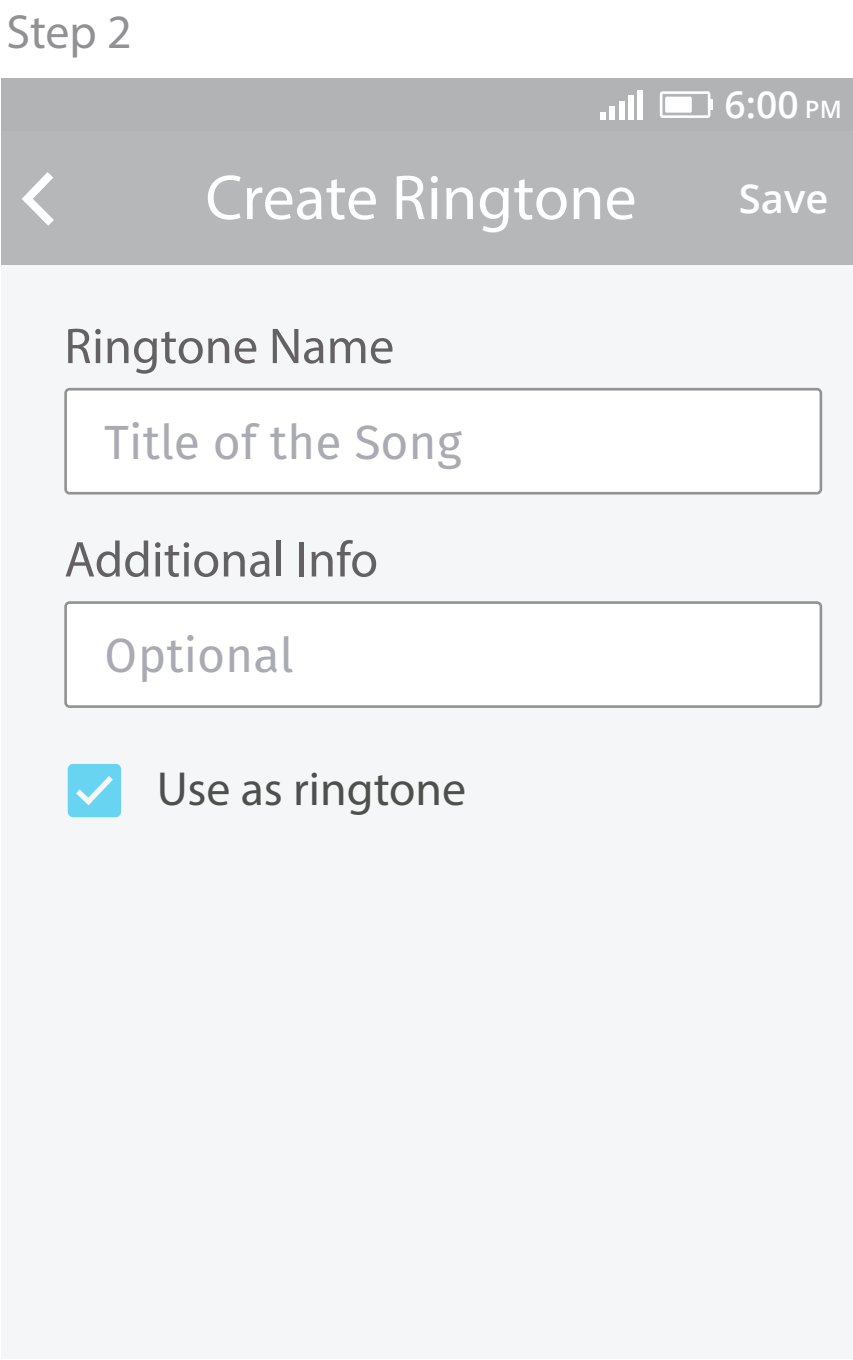

0:30   1:00   1:30

Start 00:00   End 00:30

Ringtone Length 00:30

Dragging end bar extends time
Dragging start bar moves whole area
Dragging updates the start/end in real time
and the blue bar in the scrubber
Pressing play starts at the beginning of the
clip and stop at the end.
Scrubber can be used to listen outside of
clip

Do people care about the length info?
Max and min behaviours

Step 2

‹   Create Ringtone   Save

Ringtone Name
Title of the Song

Additional Info
Optional

☑ Use as ringtone

Should we add in a "listen" button?

Work in Progress

Notes

A **File Information**
Text showing information related to the audio file is displayed. For music, this would include song title, artist, and album name. For 3rd party apps, this could be primary and secondary information.

B **Playback**
The control toggles between play and pause as the user starts and stops playback.

C **Default Ringtone**
The user has the option to make the ringtone they are creating the default ringtone. This option is defaulted to selected.

D **Save**
When saving, the title of the song or filename becomes the ringtone name. If the the file name already exists, the file should auto-increment by one. e.g Reflektor (1).

Additionally, secondary information should be provided as a subtitle. This could be an artist or some other metadata.

Other Behaviours
All other behaviours remain the same.

Comments
To retain simplicity, a progress bar does not appear duing playback. At this time, the user is not able to change the name of the saved ringtone.

Thanks!
